

Peace of mind and protection for your home,
your business and your possessions!

Our Commitment to Quality

The PipeBurst Pro Jr. provides its owners with the highest quality clean water domestic flood detection and prevention solution available in the market today. Leaks, of various types and sizes, are common and if allowed to continue can cause extensive damage and severe property loss. Being prepared for leaks can not only help keep your family and business assets safe, it can also help minimize flood damage and reduce the time and costs of recovery.

ABOUT OUR WARRANTY: Quite simply the best protection on the market. We feature a 7 year limited warranty that emphasizes our quality and premium features.

The patent pending PipeBurst Pro Jr. is a new and revolutionary professional grade system that provides rapid domestic flood protection. PipeBurst Pro Jr. combines a unique design using high tech sensors and proprietary control components which offer flexibility, proven dependability, and lasting value.

The PipeBurst Pro Jr. responds quickly to prevent costly water damage losses such as hidden mold, ruined flooring, photos, legal documents and other valuables that cannot be replaced. Quick delivery and easy installation means your system can be protecting your business, home and family immediately. Contact DIYControls.com now so we can get PipeBurst Pro Jr's peace of mind working for you!

PipeBurst Pro Jr. System Overview: Homes are packed with more appliances than ever and a lot of them feature some sort of “water usage” inside them. This exposure vastly increases the risk of a domestic water leak; but when you combine this with the fact that each of these appliances are under continuous pressure to be manufactured at an ever lower cost to satisfy the public, you begin to see how a perfect storm is developing for a significant number of disastrous water damaging events that can happen inside your home.

From an act as simple as driving a small nail into the wall to hang up a picture, a leak can develop that is non-detectable for an unforeseen period of time. The old saying “Quality never goes out of style” has significant meaning when it comes to preventing disasters that can ruin precious irreplaceable items. Additionally, your lifestyle is interrupted for what can be months of clean up and dry out time.

The answer to these problems is called the PipeBurst Pro Jr.

QUALITY is Our “Job 1”: GreenField Direct has created the PipeBurst Pro Jr. system specifying its many exclusive features only after using the highest quality components available!

- * Our quality claims are reinforced by over 35 years of practical application and manufacturing experiences.
- * Our factory is certified to ISO 9001:2008 quality standards for our manufacturing systems.

The 1” Stainless Steel TickerValve (pictured left):

- * 1” Motorized ball valve crafted with Stainless Steel.
- * The heart of the PipeBurst Pro Jr. system.
- * Waterproof and low voltage actuator.
- * TickerValve name is due to the unique sound it makes while performing its “SloFlow” opening cycle.

The SideKick (pictured left):

- * Heavy duty, high quality water sensor.
- * 20’ long, flexible wire which plugs into the VIP Jr.
- * Crafted with a weighted, stainless steel casting that houses its gold water sensors.
- * At about 3/8” tall, the SideKick can easily be slid under a refrigerator, dishwasher or similar appliance to provide point source water detection.

The VIP Jr. (pictured to the left):

- * Also known as the central control and valve interface panel for the PipeBurst Pro Jr. system.
- * Operates the TickerValve and indicates the system state with two LEDs and an audible alarm.

The FloTrol (shown on www.PipeBurstPro.com):

- * An optional accessory to the PipeBurst Pro Jr.
- * Hardwired remote control switch box used to duplicate the VIP Jr. panel functions.
- * Displays the functions that the VIP Jr. sends to it via lighted LED’s.
- * Provides a convenient one button touch to close the TickerValve at any given moment from anywhere you want in your home or business.

The PipeBurst Pro Jr. provides its owners with the highest quality domestic flood detection and prevention solution available in the marketplace today!

Let DIYControls.com provide you with the peace of mind which comes from knowing that PipeBurst Pro Jr. is working to protect your home or business, 24 hours a day - 7 days a week, against flooding, leaks or failures in the plumbing system.
